A vote for Hughes is a vote against peace.

Hughes is acceptable to the few who seek special legislation which enable the few to grow rich at the expense of the people.

Have you ever noticed that all who seek such legislation as will enable the few to grow rich at the expense of the people are lined up for Hughes and are against Wilson and all Democrats.

A vote for Hughes is doing away with "equal rights to all and special privileges none," because Hughes is backed by the crowd that want the privilege of taking unjustly from the masses. High tariff is for that purpose.

At Lincoln, Neb. Hughes said: "Correct policies will keep America out of war." This is a splendid endorsement of Wilson's policies because Wilson has kept us out of war. Hughes criticizes Wilson's policies, therefore he has other ideas and Hughes policies might plunge this country into war. Be safe and cast your vote for Wilson as that is a vote for peace and prosperity, a vote for humanity, a vote for the good of all the people.

If the utterances of one Teddy Roosevelt, with whom Hughes says he is in accord, are any indication of what either of these gentlemen would have done had by any misfortune either of them been president during the past three years, this country would now be in war with Germany. If on the other hand their utterances are only to get votes, they are not safe men to be in charge at Washington. In either case the people cannot afford to take a chance with Hughes. Continue with Wilson. He has proven to be the right man.

Mr. Farmer, Mr. Laborer, Mr. Business Man, just bear this fact in mind. When you vote for Hughes and the Republican ticket you are voting just like the special interests desire. These favored few are furnishing the Hughes campaign fund. They want Hughes because they know that he is the man who with a Republican congress pass such laws as will enable the few to prosper at the expense of you and I and all the common people.

By the way, was not Teddy Roosevelt president of the United States in 1907 when a great panic prevailed over the entire land? Certainly you have not forgotten that time when you could not even get your own money out the bank. There was no real cause for that

panic. The money plutocrats saw an opportunity to make money by the aid of the panic and Teddy did not lift his finger to prevent. Later Wilson was elected president. The Federal Reserve Bank bill was introduced. The special interests threatened a panic. Wilson suggested if the Wall Street gang wanted to start something in the panic line, that the United States government would supply the money to stop it. This money would not be put out thru the usual Republican channel, Wall Street, seeing that the starting of a panic would not benefit Wall Street gang it was soon called off. The country owes the absence of panic in this country to Wilson and a Democratic Congress. Under the old order of things panics would have been sweeping over our now prosperous land. For prosperity the people are indebted to good Constructive legislation by Democrats.
